

Green Economics Institute INVITATION TO WRITE

*Reclaiming economics for all people
everywhere, other species, nature, the planet,
and its systems*

Green Economics *International Journal of Green Economics*

International Journal of Green Economics (IJGE)

ISSN (Online): 1744-9936 -ISSN (Print): 1744-9928

Issues 2-4 Volume 7 2013

Our Academic Journal Invitation to write

We are always pleased to receive articles for our academic journal *The International Journal of Green Economics* which comes out 4 times a year with rolling deadlines, so you can always submit your papers, abstracts and ideas. It is academic, with Harvard style referencing, no footnotes, and is *double blind peer reviewed*. Many of our writers have enhanced their careers by publishing in our journal, for example obtaining promotion to Professor or becoming a Director of a major NGO or business and many other improvements to their careers or getting jobs they had always dreamed of.

There is a queue to get into this popular journal – the first and only one of its kind in the world. It is ground breaking and launched Green Economics globally. It was founded by Miriam Kennet in 2003.

We will accept 24 papers of a General Nature in 2013 under the wide and broadest umbrella of Green Economics. Additionally the special issues for 2013 include, *The Greening of Indonesia* (completed), *Greece, Cyprus and the crisis* (8 Papers will be accepted) and *Education and Pedagogy* (8 Papers will be accepted). For 2013-we have places in 3 more issues and for about 8 articles in each, so we are currently taking up to 24 more articles in 2013 and 8 general papers for Volume 8 issue 1 2014.

We welcome diverse contributions and we especially like to welcome and help with contributions from new writers and innovative ideas and also from Professors and Nobel Prize Winners and anything in between. The writing and papers for the journal have to be between **2500 and 7000 words**. We cover academic, polemic, simple and more complex writing, political, academic, campaigning and business styles of writing.

The journal is gender **balanced** and balanced between developing countries and developed country authors and also north south east and western Europe, Africa, Asia, and other areas. BRICS etc. It is also multi and inter disciplinary and also pluralist and heterodox. So please send in your articles as soon as possible. They

can take several months to double blind review depending on the subject as many of them get reviewed by several subject specialists to achieve this ground breaking mix. Sometimes however papers can go through within a month.

Please ensure you cite any items you have not written yourself and photos must all be attributed to who took them. References must be Harvard style- and we do not accept footnotes and papers must be sent in .odt, or .doc formats, (not pdfs). Please ask for further information or guidance if you need it. Please ensure you do not infringe anyone else's copyright.

Copyright for *The International Journal of Green Economics* papers only

All articles printed in this journal, become the copyright and are then owned by the academic publisher Inderscience, who produce the journal for us, so that the Institute and the author lose all rights to the writing and its use afterwards. Inderscience publishes the academic journal for us.

All other Publications, Books and Magazines of the Green Economics Institute

For all other items published by the Green Economics Institute, we do not take copyright or ownership of your work. (We, the Green Economics Institute, and our own publications only request Permission to Publish and to share copyright with you for the practical purposes of publishing for you). Our other book publishers also do not take ownership either. Please check with us fully for more clarification of IP. If you need us to explain the issues and advantages and disadvantages and how to navigate through this complex area, please email or telephone us to help you decide how and what to choose to publish and we are pleased to advise you on this.

Academic citations for your Professional objectives

All our writers and authors do get an academic citation when they publish with us in our academic journal and our academic book series, including appearing google scholar and many of the search engines used by Universities and the academic journal *The International Journal of Green Economics* is read in every continent and in some of the most prestigious libraries on the planet, so it will get your ideas out around the world! Many academics and people working in academia need to publish in peer reviewed journals as a condition of their jobs or for promotion and this journal, *The International Journal of Green Economics* meets those requirements for you.

We are very keen to encourage new writers and new ideas as well as more experienced writers and academics and policy makers and business people and campaigners. All the issues are gender balanced and diverse and are written by people from all corners of the earth.

We look forward to hearing from you very soon and to your writing for this exciting journal. We have received compliments from Princes, Members of Parliament and all sorts of organisations such as the International Labour Organisation, Prince Charles, the United Nations and the OECD. Please email us in the first instance to discuss your idea and we will be very keen to encourage you and help you during the writing. All we look for are the ideas, and we can develop any good ideas with you into a piece of suitable writing and we specialise in developing new writers and publishing new and other voices which are not usually heard! About the Academic Journal International Journal of Green Economics

IJGE addresses all aspects of Green Economics, aiming to encourage economic change and positioning Green Economics at the centre of the Economics disciplines. Green Economic theories, policies, tools, instruments and metrics are developed to facilitate a change to the current economic models for the benefit of the widest number of people and the planet as a whole. *IJGE* focuses particularly on resource management, meeting peoples' needs and the impact and effects of international trends and how to increase social justice.

Topics covered include

- Theories/concepts; critique of corporate activity, economic discourse/disciplines
- Environmental/welfare/development economics, fair-trade, aid, FDI, trickle down
- Neo-classical/Marxist/colonial, eco socialism/feminism, women's economics
- Costing resources, patriarchy and accumulation, resource allocation
- Government, freedom, democracy, privatisation, human happiness/needs hierarchy
- Bretton Woods, EU, UN, IMF, World Bank, WTO, GATTs
- Buying politics: war, arms trade, oil, war on terrorism; multinationals, globalisation
- Trading blocks, new protectionism, international governance, Tobin tax
- Offshoring, outsourcing, tariff barriers, new economic indicators, consumerism
- Green solutions, eco taxes, eco-labelling, environmental management as an industry
- Resource management, zero waste, site here to sell here, reuse, recycle, repair
- Quality of life, QoL indicators, consumerism, co-ops, land values, resource valuation
- New paradigms of the economy, grass roots activism, surplus reduction
- Social/environmental justice, participatory practices, polluter pays, triple bottom line
- Indigenous rights, less-developed countries, subsistence economies, poverty, wealth

Social justice in the economy

- Indigenous rights
- Less developed countries
- Subsistence economies
- Purchasing power parity
- Balance of rich and poor in different societies
- Poverty and its effects
- Poverty and its definitions
- Quality of life indicators
- Tools for ensuring that policies involve justice
- Environmental justice and consequences of a lack of it

Objectives

The objectives of *IJGE* are to establish an effective channel of communication between policy makers, government agencies, academic and research institutions concerned with the running, involvement and impact of the economy on all sections of society. It aims to bridge the gap between academic economic theory and the literature and suggestions for the implementation of modern concepts in the political economy and the general economic debate, structures of political power and public discussion.

The development of an alternative view in contrast to the traditional normatively biased view of economics is the prime objective. The study of Green Economics naturally has to be very multi and interdisciplinary in nature, as the problems it addresses are partly social in aspect and causes, partly scientific in technical development, partly environmental as this is a fundamental limit to all human activity and partly economic and historical in how the current situations have evolved. Green Economics is also particularly influenced by developments in ethical thinking and values and in anthropology in its explanations of past and future trends.

The scope of *IJGE* includes examining, critiquing and analysing the activities of corporations with particular reference to the localisation/globalisation debate and making suggestions for change in practise and general function and approach. *IJGE* takes an international perspective, as modern economies are interdependent and internationally linked; the Green Economics discipline has therefore to be international in scope and in the solutions it proposes. The advisory board and activities are international in nature and the main management board consists of German, English, Brazilian and US personnel, with branches in Brazil and the US. The advisory board consists of a host of academics and practitioners, government members, policy makers and campaigners from round the world in order to meet the demands and the wide scope of the subject.

Readership

IJGE provides a vehicle to help professionals, academics, researchers, policy makers and campaigners working in the fields of international business, economics and local, regional and national government to educate, influence, lobby and share information and to learn from each

others' work and best practice in the field as well as to provide a forum to explore new solutions to economic problems.

Contents

IJGE publishes original papers, review papers, technical reports, case studies, conference reports, management reports, book reviews, notes, commentaries and news. Special issues will be devoted to subjects such as globalisation/localisation, international economics etc. Our wide and very experienced advisory board (which is additional to our academic panel) are particularly being asked to develop topical and important subjects over time which they believe from their work and research to be of most relevance and interest.
